Hi Steve,
I just emailed the available documents to Mr. Bowker. Please let me know if I can be of further help.

Thanks,
FJ Hamady

FJ,
On 12/18 I forwarded a request from Kyle Bowker, of NHTSA, for information regarding a Ford recall. He needs the information as soon as possible. I know you have been out of the office for some time, but is it possible for you to respond Mr. Bowker?
Thanks
Steve

I have a management briefing on this topic scheduled for Wednesday, January 6. It'd be great if your defect reporting person could make this request a priority as soon as they return to work. Thank you!

Sincerely,

Kyle Bowker, CNG-FSI, IAAI-FIT

Kyle,
How urgent is your request? Our defect reporting person is on leave until January 4. Can your request wait until then?

Subject: RE: NHTSA contact info

Stephen,

We last spoke earlier this year on the Ford F-Super Duty 6.7L diesel EGT sensor/ engine stalling issue (EPA VERR 1310).

Ford has also conducted an emissions recall (Ford VERR 14E03) on all 2011-2014 Ford F-250/350/450/550 with 6.7L "Power Stroke" diesel engines produced from February 22, 2010 – November 6, 2013 to address issues with the SCR system. The remedy includes a new PCM calibration, which also happens to change how certain vehicles with older calibrations respond to EGT sensor faults. Essentially, the updated PCM calibration addresses many of our safety concerns with the EGT sensor faults on the 2011-2012 trucks.

Could you please send me any/all documents Ford submitted to EPA on 14E03 including draft owner notification letters and technical service bulletins?

Could you please also send me all the 14E03 quarterly reports? Ford tells us that ~75% of affected vehicles have already had their PCM reflashed but I'd like to get the official numbers from EPA. Thanks.

Sincerely,

Kyle Bowker, CNG-FSI, IAAI-FIT

To Mr. Stephen Healy,

Please see documents attached. They go with the message all the way at the bottom of this e-mail chain. Do you have any availability this afternoon to discuss? I am free from 2PM onwards. Thanks.

Sincerely,

Kyle Bowker

Subject: RE: NHTSA contact info

To Michael Sabourin,

I'd like to talk to you about 2011-2012 Ford F-250/350/450/550 SuperDuty trucks equipped with 6.7L Diesel "Power Stroke" engines. I am conducting an investigation into an alleged safety defect on these vehicles involving exhaust gas temperature (EGT) sensors and powertrain control module (PCM) software calibrations that may malfunction and result in engine stalling with no immediate restart capability. Our safety concern is disabled vehicles in or near the roadway and the risk of crash associated with that condition. I am aware of Ford's emissions recall 14E03 and I figured it would be a good idea for us to chat and share knowledge. Please feel free to give me a call at your convenience. Thanks.

Sincerely,

Kyle Bowker

Mike,

I spoke with Kyle at NHTSA this morning on the Carrollton School bus issue and he asked for your contact info on a separate issue. Can you reach out?

Thanks!
Steve
